# ATIQ UMER

0325-4243936 | [atiqumer15@gmail.com](mailto:atiqumer15@gmail.com)| [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Full Stack Developer skilled in **React.js**, **Django**, and **WordPress**. Experienced in building scalable web apps and exploring **AI Agent** Integration. Focused on delivering smart, efficient, and user-friendly solutions.

## PROFESSIONAL EXPERIENCE

**NeuralFlex | Virtual Tech Assistant**                                APRIL,2025 – Present

- Spearheaded the development and deployment of company websites and internal dashboards using **Django**, **React.js**, and **WordPress**, ensuring scalable and responsive design.
- Actively contributed to the R&D of AI-based surveillance systems, exploring the integration of **AI agents** for automation and intelligent monitoring.

**Tech Stack:** React.js, Django, WordPress, HTML/CSS, JavaScript, PostgreSQL, Git

**DI TECH SOLUTIONS | Junior WordPress Developer (Internship)**        FEB,2025 – APRIL,2025

- Assisted in developing and maintaining custom WordPress themes and plugins for client websites, ensuring mobile responsiveness and SEO-ready structures.
- Contributed to the successful launch of 2+ client projects and Collaborated with the design team to implement pixel-perfect UI using Elementor and custom CSS.

**Tech Stack:** WordPress, PHP, HTML, CSS, Elementor, JavaScript, Git

**Benchmark | Draftsman**                                JUNE,2023 – OCT,2023

- Created detailed 2D floor plans and 3D design layouts for residential and commercial projects using industry-standard tools, ensuring accuracy and adherence to client specifications.

**Tech Stack:** AutoCAD, Adobe Illustrator

## EDUCATION

- **Superior University, Lahore**                                2023 – 2027
  *Bachelor of Science in Computer Science*

- **Govt. Shalimar College, Lahore**                                2021 – 2023
  Intermediate (Pre-Engineering)

## SKILLS & OTHER

- **Frontend:** React.js, HTML5, CSS3, JavaScript, Tailwind CSS
- **Backend:** Django, Python, PHP
- **CMS & Builders:** WordPress, Elementor
- **Database:** PostgreSQL, MySQL
- **Dev Tools:** Git, GitHub, Render, PythonAnywhere
- **Deployment:** Render, PythonAnywhere, Netlify
- **Other:** REST APIs, Prompt Engineering, UI/UX Collaboration, Responsive Design, AI Agents (basic)

# CERTIFICATIONS

- **Python Data Structures** – University of Michigan (Coursera)
- **WordPress Elementor Course** – Udemy
- **LinkedIn Optimization** – The Superior University
- **Introduction to SQL** – Solo learns
- **AI Python for Beginners** – DeepLearning.AI
- **ChatGPT Prompt Engineering for Developers** – DeepLearning.AI

# PROJECTS

- **Modern Weather Dashboard |** React.js, Weather API, Tailwind CSS        [GitHub](#) | [Live Demo](#)

  Developed a responsive weather dashboard using Weather API's forecast endpoint. Shows real-time weather, hourly and 7-day forecasts, air conditions, and city-based search.

- **React Task Manager App |** React.js, Indexed DB, Tailwind CSS        [GitHub](#) | [Live Demo](#)

  Built a task manager app with local browser storage using Indexed DB. Features include task filtering, attachments, due dates, and persistent state. Designed for smooth UX .

- **Employee Management System |** Django, PostgreSQL, HTMX, Bootstrap        [GitHub](#) | [Live Demo](#)

  Developed a full-stack system to manage employees, projects, and salaries. Included role-based access, salary slips, and analytics dashboard. Deployed on PythonAnywhere.

- **Breast Cancer Detection (ML) |** Python, Scikit-learn, Pandas, Seaborn        [GitHub](#)

  Trained a logistic regression model on the Wisconsin dataset to classify tumors. Achieved ~95% test accuracy with confusion matrix and F1-score. Included EDA, scaling, and visual analysis.

- **Monal London Restaurant Website |** WordPress, Elementor        [Live Demo](#)

  Developed a modern restaurant website during my Internship at DI TECH SOLUTIONS. Added reservation features, responsive design, and custom content. Enhanced site speed and UX for mobile users.

- **NeuralFlex – Official Website |** WordPress, Elementor        [Live Demo](#)

  Built a responsive company website for NeuralFlex AI using WordPress and Elementor. Integrated service sections, contact forms, and SEO-friendly layout. Optimized performance for fast, mobile-first loading.

- **ST Dubai Tech – Official Website |** WordPress, Elementor        [Live Demo](#)

  Created a clean, responsive site for a Dubai-based maintenance company. Designed service pages, integrated contact forms, and ensured mobile optimization. Focused on performance and visual clarity.

- **Attendance Management System |** C++                                              [GitHub](GitHub)

  Created a console app with admin and student panels for attendance tracking. Features login auth, record management, and persistent text file storage. Improved C++ fundamentals and file handling skills.

- **Student Management System |** C++                                              [GitHub](GitHub)

  Built a console-based system with admin and student panels to manage registration, attendance, and records using modular functions and persistent file storage.
